Introduction

Out-of-school time learning consists of any organized program available to children and youth outside of the school day, including afterschool and summer learning programs. In addition to providing safe and supportive environments for youth outside of school, out-of-school time programs promote social, emotional, and academic development.

Historically, youth success has been measured mostly with test scores and school-related outcomes. However, youth success cannot solely be defined by test scores. In order to better support our children and youth for the future, we must redefine education to include learning that takes place outside of the classroom and redefine success to include social-emotional and 21st century skill development. This story will examine the importance of out-of-school time learning in Rhode Island and the role it plays in promoting youth success.

Landscape of Out-of-School Time Programs in Rhode Island

The Rhode Island Afterschool Plus Alliance (RIASPA), an education initiative of United Way of Rhode Island, maintains an active map of out-of-school time programs across the state. There are currently 355 afterschool and summer learning programs registered on the map, which includes many different types of out-of-school time programs that take place at schools and in the community. While this map includes many of the afterschool and summer learning programs in the state, there are many programs and organizations that are still missing from the map.

Explore the map using the drop down menu to find out more about out-of-school time programs across the state, including when programs are offered, cost, activities, and ages served. In Rhode Island, the largest source of funding for out-of-school time programs is the 21st Century Community Learning Center (CCLC), federal funding that supports high-quality afterschool and summer programs in high-poverty and low-performing schools. In addition, United Way of Rhode Island’s Hasbro Summer Learning Initiative provides funding for 17 summer learning programs in 12 communities. In Providence, Providence After School Alliance, supports and sustains high-quality afterschool and summer learning programs in most middle schools and several high schools.

Out-of-School Time Participation in Rhode Island

According to the 2014 America After 3pm survey, of Rhode Island’s school-aged children, only 34,704 (22%) participate in afterschool programs. In fact, in 2014, 27,062 children were alone and unsupervised during the hours after school. While participation in afterschool programs has increased from 19% in 2009 to 22% in 2014, Rhode Island still has ways to go.xi In many communities, access to high-quality and affordable afterschool programs remains limited. Approximately 50% of programs included in RIASPA’s map offer out-of-school time programs for free; however, space in these programs is limited due to lack of funding. On average, Rhode Island families spend $96 per week for afterschool programs.xii

Lack of access to high-quality and affordable out-of-school time programs widens the opportunity gap.xiii In 2014, RIDE’s 21st CCLC provided $5,631,913 in funding to 59 centers in high-poverty schools, supporting access to high-quality and affordable afterschool and summer programming. While there are 56,113 students in Rhode Island who are eligible to participate in 21st CCLC programs, only 13,631 students participated in 2012-2013. Currently, there is no state funding source for out-of-school time programs in Rhode Island.

Defining Youth Success

There are many factors that contribute to youth success. In order to best prepare youth for success in school and beyond, we must broaden our definition of success and increase opportunities that promote the following outcomes in youth:

- **Higher Engagement in Learning** both in school and outside of school, often leading to increased attendance and reduced behavioral instances.
- **Positive Skills and Beliefs**, including social-emotional development and 21st century skills.
- **Academic-Related Outcomes**, including grades, on-time promotion, and sense of academic competence.\(^xiv\)

In the following slides, you will find examples of how 21st CCLC programs in Rhode Island have promoted these outcomes and the national research that supports these findings.

**Regular Participation and Program Quality Are Key**

**Youth who participate frequently and regularly in out-of-school time programs show the greatest gains.**

As shown on the left, in 2013, 4,394 youth participated regularly (more than 30 days each year) in a 21st CCLC program, with approximately half of those youth attending more than 60 days a year.

**Rhode Island’s 21st CCLC supports high-quality programs.** As seen on the right, all 21st CCLC programs in Rhode Island use a program quality assessment tool that continuously promotes and ensures that programs provide safe and supportive environments for youth that nurture engagement and positive interactions between youth and adults. National research shows that regular participation in high-quality programs lead to increased youth outcomes.

**Note:** The program quality data displayed for the 21st CCLC sites represents the most recent year of data available for each site and averages together all observations for that year. Observations are not random and are frequently scheduled for sites as a way of focusing on known issues.

Higher Engagement in Learning

When youth are engaged in learning, they are less likely to have behavioral incidents and more likely to come to school. Youth in Rhode Island who participated regularly in 21st CCLC programs had on average far fewer unexcused absences and suspensions per school year than their peers who were similar demographically. For every 1 unexcused absence that regular 21st CCLC participants had, their peers had 2.6. For every 1 disciplinary suspension that regular 21st CCLC participants had, their peers had 2.4. \(^{xvii}\)

“I thought this would be like school. This is NOT like school. If school were like this, I would want to go every day!” – Janeida, a 5th grade student from Connecting for Children and Families Chillin’ and Skillin’ Summer Program

Positive Skills and Beliefs

Most youth who attend a 21st CCLC program believe that participating has helped them to develop social and personal skills. Based on a survey of all 4th through 8th grade participants, 71% of youth agree or mostly agree that it has helped them to make new friends and 67% say it has helped them feel good about themselves. \(^{xviii}\)

National research backs up these results. Research shows that children who participate in out-of-school time programs show a significant improvement in their perceptions of themselves, improved positive social behavior, and decreased problem behaviors.\(^{xix}\)

Positive Skills and Beliefs

"[New Urban Arts] is essentially my place of worship, a sanctuary, and a place of constant discovery. It is the space that has kept me sane and has given me hope in the universe. I'm most "me" here, even though I don't quite know what that is yet, whatever I am... or whoever I should be is safe, is welcomed and encouraged here. NUA has shown me what the healthiest forms of community are like. NUA is my greatest love and friend. NUA is everything."

- Joely, Student from New Urban Arts

**Academic-Related Outcomes**

![Bar Chart of Coming here has helped me to try harder in school (All Youth)](image)

Most youth who attend a 21st CCLC program believe that participating has helped them to develop their academic skills. Based on a survey of all 4th through 8th grade participants, 65% of youth agree or mostly agree that the program has helped them try harder in school. xx

New national research demonstrates that more consistent time spent in afterschool activities during the elementary school years is linked to narrowing the gap in math achievement at grade between low-income and high-income students. xxi Students participating in a high quality out-of-school time programs went to school more, behaved better, received better grades and did better on tests compared to non-participating students. xxii

**Redefining Education, Redefining Success**

Preparing children for college, careers, and life takes more than just reading, writing, and math. To be successful, children need to develop socially and emotionally, and need to think critically, work in teams, and communicate effectively.

Out-of-school time programs provide opportunities for students to explore, learn, and develop beyond their time in school. However, we must ensure that all children and youth have access to high-quality and affordable out-of-school time learning opportunities. In order to better promote youth success, we must redefine education to include learning that takes place outside of the classroom and redefine success to include social emotional and 21st century skill development.

**Next Steps for RI**

1. **Gather more information** about the full range of afterschool and summer learning programs in our state to find out where access to quality and affordable programs is limited.

2. In collaboration with schools, **determine and collect youth outcomes data** beyond test scores to better understand and improve the well-being of youth in our state.

3. **Increase capacity of out-of-school time programs** to collect and utilize youth outcomes data to demonstrate the impact on youth success.

4. **Expand access** to high-quality and affordable afterschool and summer learning programs.
